

**Fragaria x ananassa**

**Fragaria x ananassa**

**STRAWBERRY**

Runner spreading plants produce sweet juicy fruits.

Color: White blooms with yellow center, red fruit, green leaves may be tinged with red  
Height: 6"-10" Spread: 2'-3'  
Zone(s): 4-10 | ☀️ ☀️

**DAY NEUTRAL**

Produces the smallest fruit, but gives good yield, and stands up to warm weather.

'Evie 2'

**EVERBEARING**

Long season fruit production. Fruit is smaller than June Bearing.

'Ozark Beauty'  
'Quinalt'

**JUNE BEARING**

Produces one crop of large firm fruit. Good for fresh eating or freezing.

'Allstar'  
'Earliglow'  
'Honeye'

**Citrullus lanatus**

**WATERMELON**

'Sugar Baby'

A more compact vine producing small eight to ten pound early fruit with thin dark green skin and sweet firm red flesh.

Height: 12"-24" Spread: 3'-6'  
☀️

**Rheum x coltorum**

**RHUBARB**

Tender skinned stalks with flavorful juice require no peeling.

'Victoria'

Tender skinned stalks require no peeling with flavorful juice.

Color: Stalks crimson red turning to green in center  
Height: 2'-4' Spread: 3'-4'  
Zone(s): 4-8 | ☀️ ☀️

**Rubus idaeus**

**RASPBERRY**

Delicate fruit, good for eating fresh, canning, cooking, baking, freezing, wine, and other spirits making.

Color: White bloom with yellow center, red, yellow, purple, near black  
Height: 3'-6' Spread: 1'-3'  
Zone(s): 4-8 | ☀️

'Anne'

Fall bearing, pale yellow berry, very sweet flavored fruit.

'Royalty'

Hardy purple hybrid that ripens in mid-July. Good yield. High disease and insect resistance.

'Bristol'

Mid season black berry, excellent flavor.

'Heritage'

Ever bearing red berry, no staking needed.

'Latham'

Ever bearing with good fall crop, sweet large red berry.

**Vaccinium corymbosum****'Putte'****Vaccinium angustifolium**

## LOW BUSH BLUEBERRY

Stoloniferous plant provides a fruiting ground cover in landscape. Plant two varieties for best pollination and fruit production.

Color: White to pale pink blooms, light blue to blue-black berries, green foliage with red fall color

Height: 8"-24" Spread: 3'-8'

Zone(s): 3-7 | ☀️ 🌙

MID SEASON  
'Northcountry'

LATE SEASON  
'Michigan'  
'Putte'

**'Duke'****Vaccinium corymbosum**

## Highbush Blueberry

Most planted group, these bush shapes range from short and compact to tall and open. Best to pair varieties for increased pollination and fruit production.

Color: White to pink blooms, light blue to blue-black berries, green foliage, fall color

Height: 3'-8" Spread: 3'-8'

Zone(s): 3-7 | ☀️ 🌙

EARLY SEASON

'Elliot'

**'Blue Jay'****'Polaris'****Vaccinium corymbosum x Vaccinium angustifolium**

## HALF-HIGH BLUEBERRY

Cross between high and low bush. Berry quality is very good, but can have lower yield. Excellent ornamental in landscape.

Color: White to pink blooms, deep blue berries, green foliage, bright fall color

Height: 20"-4' Spread: 2'-4'

Zone(s): 3-8 | ☀️ 🌙

EARLY-MID SEASON  
'North Country' | MID SEASON  
'Chippewa'

**Vaccinium macrocarpon****Vaccinium macrocarpon**

## AMERICAN CRANBERRY

Northeast native low growing evergreen shrub. Spreads forming a thick mat of small glossy leaves which turn reddish in fall.

**'Pilgrim'**

Largest fruit producing variety. Trailing habit makes nice hangers and planters.

Color: Pink blooms, red fruit

Height: 6"-8" Spread: 1'-3'

Zone(s): 3-8 | ☀️ 🌙

### **Eruca sativa**

#### ARUGULA

Tangy pepper flavored, serrated leaf. Compact habit. Best grown as cool weather crop.

Height: 6"-12" Spread: 4"-7"

#### 'Astro'

Medium/early dark green leaf variety.

### **Solanum melongera**

#### EGGPLANT

Attractive, ornamental in garden or pots.

Color: Purple flowers. Glossy dark purple, black, green, creamy white fruit

Height: 20"-36" Spread: 12"-24"

#### 'Hansel'

Abundant clusters of mild flavored, non bitter dark purple two to ten inch fruit.

#### 'Satin Moon'

Glossy purple-black, oval fruit features excellent flavor and firm texture.

### **Phaseolus vulgaris**

#### BEANS

#### 'Gold 'N Green Mix'

Two colors of French filet style beans on one bush. Slender, four to six inch, stringless, tender pods.

Height: 12"-22" Spread: 8"-18"

#### LEAF

#### 'Alfresco Mix'

This fresh crisp zesty Mediterranean style mix includes red and green lettuce, endive, arugula, and radicchio.

### **Cucumis sativus**

#### CUCUMBERS

Rapid growing in warm season with plenty of water. Eat fresh or small fruits good for canning.

Color: Dark to bright green or yellow fruit, green leaves

Height: 6"-24" Spread: 2'-6'

#### PICKLING

#### 'Bush Pickle'

Crisp, tender, four to five inch, mild flavored fruit. Bush habit.

#### SLICING

#### 'Burpless'

Firm bitter free burpless eight to ten inch fruit with few seeds.

#### 'Bush Champion'

Crisp, eight to twelve inch, fruit on compact bush habit.

#### 'Dasher'

Early high yield, straight, eight inch fruit.

#### 'Marketmore'

Sweet mild flavor, thin skin, eight to nine inch fruit. Northeast standard.

#### 'Slice More'

High yield, crisp eight inch fruit.

#### 'Sweeter Yet'

Very early, mild, sweet, burpless twelve inch fruit.

### **Lactuca sativa**

#### LETTUCE

Sow multiple crops two weeks apart for longer harvest that produces two to three times when cut back.

Height: 8"-15" Spread: 6"-8"

#### BUTTERHEAD/BIBB

#### 'Buttercrunch'

Vigorous, compact, loose, six to eight inch rosettes of dark, green, tender, crisp, buttery textured leaves.

#### 'Global Gourmet Mix'

Blend of red and green lettuces, asian brassicas, and herbs good for salads and stir frying.

#### ROMAIN

Large, medium-green, slightly blistered leaves. Cold tolerant.

### **Pisum sativum var. macrocarpon**

#### PEA

#### 'Sugar Snap'

High yield over extended period of crisp sweet juicy pea in edible three inch fleshy pod. Holds in hot weather.

Height: 6' Spread: 8"

**Capsicum****PEPPERS**

From sweet to hot for all palates and culinary uses. Produces fruit mid season to fall. Glossy green, red, or yellow fruit

Height: 18"-24" Spread: 12"-18"

**SWEET BELL****'Baron'**

Prolific early red variety, very sweet, thick, walled four lobed.

**'Bell Boy'**

One of the best all purpose peppers. Green to red, thick, walled bell fruit.

**Capsicum****PEPPERS****'Jalapeno Gigante'**

Mildest of the Jalapenos also the largest at three to five inches. Green to red fruit.

**'Better Belle'**

Early dependable high yield of green to red bell fruit.

**'California Wonder'**

Produces abundant, blocky green to red, crisp, thick walled, sweet bell fruit.

**SWEET NON BELL****'Cubanelle'**

Yellow-green to red, thin walled, crisp, mild flavored flesh. Tapered fruit.

**'Super Chili'****HOT****'Cayenne Long Slim'**

Very hot, red fruit that are about five inches long and half inch wide. Very popular for drying.

**'Jalapeno M'**

Green to red pungent, sweet, medium heat, thick, walled fruit.

**'Mariachi'**

Yellow to red, compact, early high yield, mild, thick flesh.

**'Serrano'**

Thin green skin that will ripen to red, brown, orange, or yellow. Known to be much hotter in flavor than Jalapeno.

**'Super Chili'**

Upright positioned fruit grows to two and a half inches long and one inch wide with colors ranging from bright orange to red.

**'Tabasco'**

Matures from green to yellow and can grow to about sixty inches. Medium hot heat is used as the central ingredient in tobasco sauce as well as to infuse vinegars.

**Spinacia oleracea****SPINACH**

Broad leafy vegetable rich in vitamins and antioxidants.

Height: 6"-10" Spread: 6"-8"

**'Tyee'**

Good three season variety, slow to bolt, consistent production, upright semi-savoy heavy, dark, green, ten inch, leaves are thick, a bit glossy, with excellent flavor.

**Cucurbita****SQUASH****'Dark Green'**

Vigorous bush with extremely high yields of slender, dark green fruit that are best when harvested at 6"-8".

**'Ball's Zucchini II'****Cucurbita****SQUASH**

Summer squash produces season long with regular harvesting of young fruit. Winter squash should be left to mature on vine and lasting well into winter.

Height: 8"-10" Spread: 4'-10'

**'Ball's Zucchini II'**

Very early high yields of straight slender glossy green seven to eight inch zucchini. Summer.

**'Early Summer Crookneck'**

Smooth, bright yellow, eight to ten inch, curved neck, meaty and flavorful fruit, matures to orange yellow. Summer.

**'Yellow Summer'**

Smooth, straight neck squash that can grow up to 10" long. Best when harvested young.

**'Early Summer Crookneck'**

## **Solanum lycopersicum**

### **TOMATO**

Most popular planted fruit.  
Great eaten fresh or many uses in kitchen.

Indeterminate-stake or pole. Develops blooms, blossoms progressively, and harvest lasts several months.

Determinate-bush type. Benefits when caged. Develops blooms and blossoms at the same time. Harvest is short, seven to ten days.

Height: 2' - 10' Spread: 12" - 24"

### **BEEFSTEAK**

#### **'Beefmaster'**

Heavy yield of meaty, mild and sweet red fruit. Indeterminate.

#### **'Supersteak'**

Red, meaty, rich beefsteak flavored, slightly acidic fruit. Indeterminate

### **CHERRY AND GRAPE**

#### **'Jelly Bean Red'**

Clusters of very sweet red fruit. Indeterminate.

#### **'Jelly Bean Yellow'**

Prolific yield of very sweet, crack resistant, yellow fruit. Indeterminate.

#### **'Juliet'**

2" long by 1 ½" wide fruit resembling a cross between a grape and roma tomato. Good crack resistance and shelf life. Indeterminate.

#### **'Sugar Plum'**

High yielding clusters of rich, red, sweet, one inch fruit. Indeterminate.

#### **'Sun Gold'**

Sweet golden orange fruit in large clusters. Indeterminate.

#### **'Sun Sugar'**

High yield, golden, sweet, low acid fruit. Indeterminate.

#### **'Sweet Baby Girl'**

High, yieldin, compact, open plant with long clusters of dark red, sweet, crack resistant fruit. Indeterminate.

#### **'Sweet 100'**

Long branches with clusters of small red fruit. Indeterminate.

### **HEIRLOOM**

#### **'Brandywine'**

Beefsteak-heavy producer of sweet fruit with nice acidity and rich creamy after taste. Indeterminate.

#### **'Cherokee Purple'**

Late season producer of dusky purple-pink fleshed fruit having superb rich sweet full flavor. Indeterminate.

#### **'Genuwine'**

Bright red heirloom hybrid variety with high yield and early maturity. Good blemish resistance and flavor. Indeterminate.

#### **'Mister Stripey'**

Huge crop producing yellow and red fleshed mildly sweet and rich fruit. Indeterminate.

### **SALADETTE/PASTE**

#### **'San Marzano'**

Heavy yield of cylindrical, red, four ounce fruit with thick, meaty flesh and small seed cavity. Indeterminate.

### **SALADETTE/PASTE**

#### **'Amish Paste'**

Bright, deep red, thick, juicy, meaty flesh, nearly seedless fruit. Indeterminate.

#### **'Roma'**

Thick, meaty, egg-shaped fruit. Popular for pastes and sauces. Determinate.

### **SLICER**

#### **'Better Boy'**

High yield of bright red, juicy, meaty, globe fruit with balance of acidity and sweetness on stocky plant. Indeterminate.

#### **'Black Krim'**

Dark maroon medium-sized beefsteak-type fruit. Indeterminate.

#### **'Big Boy'**

Long harvest period from mid season. Thick walled, meaty, rich, flavored, red globe fruit resists cracking. Indeterminate.

#### **'Bush Best Boy'**

Compact plant with high yield of thick, juicy fruit. Determinate.

#### **'Bush Champion II'**

Flavorful, red, meaty, globe fruit on compact plant. Determinate.

#### **'Carolina Gold'**

Large glossy gold beefsteak tomato that is highly disease resistant and known for sweet mild flavor. Determinate.

#### **'Celebrity'**

Clusters of all purpose, red, deep oblate, crack resistant, exceptionally flavored fruit. Determinate.

#### 'Chocolate Sprinkles'

High yielding, hybrid grape tomato with unique, striped, bicolor fruit. Crack resistant. Indeterminate.

#### 'Champion II'

High yields of red, solid, meaty fruit with a "just right" sweetness. Determinate.

#### 'Tidy Treats'

This compact plant produces three-quarter to one inch fruit all season long. Perfect for small spaces. Indeterminate.

#### 'Early Girl'

#### 'Early Doll'

Early red fruit. High yield over long period. Slightly flattened flavor packed globe. Indeterminate.

#### 'Early Girl'

Early meaty red globe fruit with incredible flavor and aroma. Produces over long period. Indeterminate.

#### 'Fourth of July'

#### 'Fourth of July'

Produces high yields early and into the fall. Red fruit flavor improves as season warms. Indeterminate.

#### 'Jet Star'

High yield, low acid, firm, and meaty, crack resistant, fruit. Indeterminate.

#### 'Phoenix'

Mid season, uniformly color, bright, red fruit. Determinate.

#### 'Pink Lady'

Good yield of thick skin, super juicy, and delicate, textured meat of deep oblate pink fruit, over ripened turns red. Indeterminate.

#### 'Sunny Goliath'

Yellow to gold, low acidity, mild sweet medium soft flesh. Indeterminate.

#### 'Supersonic'

Midseason fruits are firm, meaty, and very large with excellent resistance to cracking. Known for being vigorous and disease resistant. Indeterminate.

#### 'Indigo Rose'

#### 'Indigo Rose'

The two inch, round, fruit of this vigorous producer has deep, rich, nearly purple skin and flesh. Indeterminate.

#### 'Phoenix'
