

Actinidia arguta

HARDY KIWI

'Issai'

Vigorous, deciduous twining vine with glossy foliage and fragrant white blooms in early summer, followed by an abundance of small, delicious smooth-skinned fruit.

Height: 12'-20' Spread: 3'-5'

Growth: Fast

Soil: Well-drained, average

Zone(s): 4 | ☀

Actinidia kolomikta

'Arctic Beauty'

Vigorous twining vine with pink, white and green variegated foliage creates a beautiful display, and covered with small fragrant white flowers.

Height: 15'-20' Spread: 5'

Growth: Fast

Soil: Well-drained, average

Zone(s): 4-8 | ☀ ☀

Akebia quinata

CHOCOLATE VINE

Twining vine with blue-green palmately compound leaves and slightly fragrant, chocolate brown drooping racemes June - July. Four inch long fruit pods split open in the fall. Edible

Height: 20'-40' Spread: 6'-9'

Growth: Fast

Soil: Well-drained, adaptable

Zone(s): 4 | ☀ ☀

Aristolochia durior

DUTCHMAN'S PIPE

Large, heart-shaped foliage provides a dense cover. Hidden underneath the foliage are unique pipe-shaped blooms in green, purple and yellow from May to June. Popular vine for shady porches.

Height: 15'-30' Spread: 15'-20'

Growth: Fast

Soil: Well-drained, average

Zone(s): 4 | N | ☀ ☀

Campsis radicans

TRUMPETCREEPER

'Flava'

A very vigorous clinging deciduous vine that produces bright yellow to yellow-orange trumpet flowers from June to September. Leaves are green in summer turning yellow in fall.

Height: 30'-40' Spread: 20'-30'

Growth: Fast

Soil: Well-drained, moist, adaptable

Zone(s): 5 | N | ☀

Campsis x tagliabuana

TRUMPETCREEPER

'Madame Galen'

The compound pinnate leaves of this cultivar are shiny on top and glabrous, light green beneath. Flowers are vivid orange-red and bloom from July to September.

Height: 30'-40' Spread: 20'-30'

Growth: Fast

Soil: Well-drained, moist, adaptable

Zone(s): 5 | ☀

'Indian Summer'

Slower growing and more manageable than Madame Galen. Has yellow-orange trumpet shaped flowers with a red throat.

Height: 15'-20' Spread: 15'

Growth: Fast

Soil: Well-drained, moist, adaptable

Zone(s): 4 | ☀ ☀

Clematis

A large group of deciduous climbing or shrubby vines, with a vast range of flower colors, shapes, and sizes. The height and spread of clematis depends on variety and the plant support provided. Plants require full sun for best flowering, but their roots need to be kept cool.

Height: 6'-30' Spread: 6'-30'

Growth: Moderate

Soil: Well-drained, moist

Zone(s): 4 | ☀ ☀

'Asao'

Compact variety with large, rose pink flowers that bloom from late spring – early summer and repeats in late summer.

Height: 6'-8' Spread: 4'-6'

'Bee's Jubilee'

Large light pink flowers with a deep red bar down the middle of each petal. Flowers May - June and repeats in September.

Height: 6'-8' Spread: 6'-8'

'Comtesse de Bouchard'

Profuse bloomer with large, rosy-pink flowers from May to June and again from August to September.

Height: 8'-12' Spread: 4'-6'

'Dr. Ruppel'

Large pale purple flower with a wide carmine central bar on each ruffled petal that will bloom in May, June and September.

Height: 8'-12' Spread: 4'-6'

'Henryi'

A classic clematis with large, creamy white flowers and dark stamens that bloom from July through September.

Height: 6'-8' Spread: 3'-6'

**Clematis** *(continued)***'Jackmanii'**

The most popular and reliable of the Clematis vines with large, showy deep purple-violet flowers that will cover the vine through most of the summer and into the fall.

Height: 7'-10' Spread: 3'-6'

'Jackmanii Superba'

A fuller flower than the original 'Jackmanii.' Large, deep purple flowers bloom from mid June through August.

Height: 12'-20' Spread: 2'-4'

**'Nelly Moser'**

Pale pink flowers with deep pink bars going up the middle of each petal are produced profusely from late spring through summer.

Height: 6'-10' Spread: 4'-6'

Niobe

Deep magenta flowers have golden anthers and are produced in June and again in September.

Height: 10'-12' Spread: 6'-8'

'Ramona'

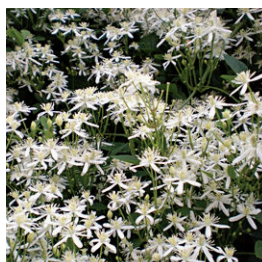

Large, light lavender flowers bloom from June through September.

Height: 8'-12' Spread: 3'-6'

**Ville de Lyon**

Large, showy, carmine red flowers cover the vine the entire summer.

Height: 10'-12' Spread: 3'-6'

**Clematis paniculata****SWEEP AUTUMN CLEMATIS**

Vigorous vine with billowy masses of small, white, fragrant flowers against leathery dark green leaves. Blooms August through October. More shade tolerant than other Clematis.

Height: 15'-20' Spread: 15'-20'

Growth: Moderate

Soil: Well-drained, moist

Zone(s): 4 | ☀️ ☀️

**Hydrangea anomala petiolaris****CLIMBING HYDRANGEA**

A vigorous clinging vine with deep green heart-shaped leaves and flat, creamy white lacy cap flowers that bloom May to September.

Height: 60'-80' Spread: 60'-80'

Growth: Slow to moderate

Soil: Well-drained, moist, rich

Zone(s): 5 | ☀️ ☀️

**Lonicera x brownii****BROWN'S HONEYSUCKLE****'Dropmore Scarlet'**

Tubular red flowers cascade on this climbing clinging vine from late spring into fall.

Height: 10'-20' Spread: 10'-20'

Growth: Fast

Soil: Well-drained, moist

Zone(s): 4 | ☀️ ☀️

**Lonicera x heckrottii****GOLDFLAME HONEYSUCKLE****'Goldflame'**

Twining, climbing habit with blue green leaves. Tubular flowers are pink on the outside and yellow on the inside. Blooms from June till frost.

Height: 10'-20' Spread: 10'-20'

Growth: Fast

Soil: Well-drained, moist

Zone(s): 4 | ☀️ ☀️

**Lonicera periclymenum****WOODBINE HONEYSUCKLE****'Peaches and Cream'**

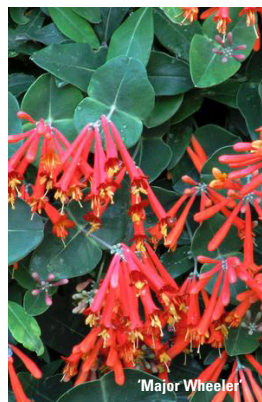

Compact twining vine with deep pink-red flowers and a creamy yellow throat, that bloom May through August.

Height: 5'-10' Spread: 2'-5'

Growth: Moderate

Soil: Well-drained, moist

Zone(s): 4 | ☀️ ☀️

**Lonicera sempervirens****TRUMPET HONEYSUCKLE****'Blanche Sandman'**

Has a climbing, twining habit. Coral Red tubular flowers with gold anthers over bluish-green foliage May through October.

Height: 10'-20' Spread: 10'-20'

Growth: Fast

Soil: Well-drained, moist

Zone(s): 4 | ☀️ ☀️

'Major Wheeler'

Orange-red tubular trumpet-shaped flowers have yellow-orange on the inside. Blooms last from June till frost.

Height: 10'-20' Spread: 10'-20'

Hedera

See groundcover section

Parthenocissus quinquefolia

VIRGINIA CREEPER

A native, fast growing, clinging and twisting vine. The new growth is reddish bronze, turning green in late spring-early summer. Fall coloring is red-purple to crimson.

Height: 30'-50' Spread: 30'-50'
Growth: Fast
Soil: Well-drained, moist, acidic
Zone(s): 4 | NE | ☀️

'Engelmanni'

Differs from the species, by being slower growing and having smaller leaves, which turn more bronze-red in the fall.

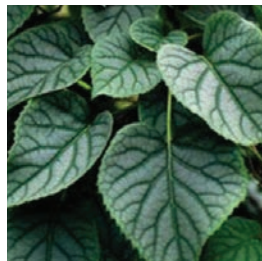

Polygonum aubertii

SILVER LACE VINE

Fast-growing vine with two seasons of bloom in late spring and again in the fall. Flowers are small, creamy white in frothy clusters against light green heart-shaped foliage.

Height: 25'-35' Spread: 15'-25'
Growth: Fast
Soil: Well-drained, sandy loam
Zone(s): 4 | ☀️

Schizophragma hydrangeoides

MOONLIGHT JAPANESE HYDRANGEA

Deciduous, woody-stemmed climbing vine. Heart-shaped leaves and large, flat creamy white flowers. Blooms from July to August.

Height: 20'-30' Spread: 6'-9'
Growth: Moderate
Soil: Well-drained, moist, rich
Zone(s): 5 | ☀️ ☀️

Parthenocissus tricuspidata

JAPANESE CREEPER, BOSTON IVY

Native to China and Japan but widely used in the US. A climbing ornamental plant used to cover the facades of masonry buildings. Glossy green foliage with vibrant fall color.

Height: 30'-50' Spread: 30'-50'
Growth: Fast
Soil: Well-drained, moist, acidic
Zone(s): 4 | ☀️

'Boston Ivy'

Similar to Virginia Creeper, but leaves are a more glossy green and only three lobed. Red fall foliage accompanied by blue black fruit.

'Fenway Park'

Differs from species by having yellow foliage.

'Vetchii'

Larger leaves turn bright crimson-red in fall.

Wisteria frutescens

AMETHYST FALLS WISTERIA

'Amethyst Falls'

Slower growing more compact selection. Fragrant lavender flowers in June.

Height: 15'-20' Spread: 10'-15'
Growth: Fast
Soil: Moist
Zone(s): 6 | ☀️

Wisteria macrostachya

AUNT DEE WISTERIA

'Aunt Dee'

Slightly fragrant, light purple flowers. Blooms in May.

Height: 15'-20' Spread: 10'-15'
Growth: Fast
Soil: Moist
Zone(s): 6 | ☀️
